What will we cover?

A horizontal bar composed of three segments: a pink segment on the left, a dark red segment in the middle, and a teal segment on the right.

Whether you're new to VMS or considering an upgrade, today's session will walk you through the key steps and strategies to present a strong case to your board and senior leadership.

- **Introduction**
- Overview of a Volunteer Management System
- Challenges in Volunteer Management
- **Developing a Business Case**
- Key Takeaways
- Q&A

What is a Volunteer Management System?

A VMS automates key administrative tasks and centralises data related to volunteers, making it easier for organisations to track participation and manage relationships.

Volunteer Recruitment & Onboarding

Scheduling & Task Management

The Current Challenges in Volunteer Management

**Lack of Visibility
and Coordination**

**Time-Consuming
Manual Processes**

**Volunteer
Engagement and
Retention Issues**

**Compliance and
Safeguarding
Challenges**

Developing a Business Case

Why you need to build a business case for your VMS

This is your chance to take a step back and reflect, not just on the challenges of your current system, but on the opportunities a VMS presents - that's the key.

A good business case is there to help your Board and SLT share in your vision

How to Define the Challenges Your Organisation Is Facing

1

Identify the Pain Points

- What inefficiencies exist in your current volunteer management process?
- Are volunteers dropping off due to lack of engagement or poor communication?
- Are administrative tasks consuming too much staff time?
- Is compliance and safeguarding a concern?
- Are you struggling with volunteer recruitment or retention?

How to Define the Challenges Your Organisation Is Facing

2

Gather Evidence & Data

- Speak with your **volunteer coordinators, frontline staff, and volunteers** to identify frustrations.
- **Quantify the impact:**
 - How much staff time is spent on manual processes?
 - Are there delays in placing volunteers into roles due to inefficient processes?
 - Are you losing track of volunteer hours and contributions?
- **Use Data to Strengthen Your Case**

“Right now, **we process applications manually**, which means it takes an average of **5 hours per volunteer to complete onboarding**. Across 500 volunteers per year, this results in **2,500 hours of admin time**—time that could be better spent on direct impact.”

How to Define the Challenges Your Organisation Is Facing

A decorative horizontal bar consisting of three segments: a red segment on the left, a dark teal segment in the middle, and a light teal segment on the right.

3

Connect Challenges to Strategic Goals

Decision-makers are more likely to approve funding when they see how a VMS directly contributes to the organisation's mission and priorities.

- Is there a strain on your current service and do you need more volunteers in order to meet demand?
- Do you need to increase visibility of volunteer contributions in order to secure funding?

“Our goal is to **increase volunteer engagement by 30% over the next year**, but right now, our **onboarding process takes 4-6 weeks**, which is leading to a **40% drop-off rate.**”

Outline the Potential ROI

Cost Savings vs. Cost of Inaction

If a VMS reduces admin time by **30%**, that frees up **hundreds of hours annually**, allowing staff to focus on strategic initiatives.

Improved Volunteer Retention = Higher Impact

Reducing turnover means **less time and money spent on recruitment and training**.

Stronger Data for Funding & Grants

Demonstrating efficiency and impact can help **unlock more funding opportunities**.

Key Takeaways

1

Assess Your Organisation's Volunteer Management Challenges

2

Research and Compare VMS Options

3

Build a Clear, Data-Driven Business Case

4

Engage Stakeholders Early to Build Support

Investing in the right Volunteer Management System isn't just about efficiency - **it's about empowering your volunteers, maximizing impact, and helping your charity achieve its mission more effectively.**
